
Abstracts will be accepted for review from members of the ISCP, CSP and other affiliated health professional bodies.

Abstracts should be submitted online through the ISCP web application <https://iscp2022.exordo.com>

A 550- word limit applies. Please do not use tables or figures and limit to two references if appropriate. Please note that *all sections* of the online application form must be completed.

The deadline for submission is **Wednesday 15th June 2022**. If you have queries related to abstract preparation please email the Professional Development Unit on professionaldevelopment@iscp.ie

Both research reports and theory, practice or service development reports will be accepted.

Please indicate in your submission if you have sought ethical approval and if so, please state what body has approved your project, e.g. Yes – SJH/AMNCH Ethics Committee.

If you have not sought ethical approval, please outline the reasons for this. Please refer to the following document regarding your consideration of appropriate ethics. www.iscp.ie/file_downloader.php?file_id=1535

Instructions to authors for research report

Authors should adhere to a sequential format and must use the following headings.

Objectives: describe the aim and objectives of study

Methods: methodological approach and data collection

Results: briefly summarize main findings from analysis

Conclusion: what can be concluded from results. Implications - for practice/management/education/policy

In instances where your work was funded you should include a funding acknowledgment in your submission from all funding sources that supported work.

References: use the Harvard system of referencing and include DOI details where appropriate

Authors (Year) Title. Journal, Volume: Pages. e.g. Smith A, Jones B. (2005) Too much of anything is bad for you. Journal of Science, 20: 241-7 Smith A, Jones B. (2005) Too much of anything is bad for you. London, The McGraw-Hill Companies, Inc

Instructions to authors for theory, practice or service development report

Authors should adhere to a sequential format using the following headings.

Objective: describe the aim and objectives of study

Methods: methods, materials and principals involved and how they have been developed and used. Evaluation – how was the information evaluated

Results: briefly summarize main findings

Conclusion: what can be concluded from the development and evaluation. Implications - for practice/management/education/policy

In instances where your work was funded you should include a funding acknowledgment in your submission from all funding sources that supported work.

References: use the Harvard system of referencing and include DOI details where appropriate
